D O No 284 B

OFFICE OF THE SENIOR SURGEON WITH THE GOVERNMENT OF MYSORE

Bangalore 24. 12. 1908

My dear Dr Bhabha

Only 13,000 is available from my budget, but this sum plus the amount saved through my hands, over the Electrodynamical Laboratory Work will provide the necessary

MEMO. (5

The Senior Surgeon proposes to remove the Maternity Hospital to the Chamaraja Sanskrit College buildings and the Bacteriological laboratory to one of the buildings of the present Maternity Hospital. The Bacteriological laboratory will be available for use as a large Science lecture room for the Central College The new theatre proposed to be constructed behind Dr Lehmann's laboratory at a cost of over Rs 30,000 will therefore not be required Dr Teavers and Mr Tait approve of converting the Bacteriological laboratory into a lecture theatre. Dr Travers however thinks that an additional floor and certain minor alterations will be necessary which will not cost more than Rs.10,000 The wooden theatre and lecture table &c., will also cost a small sum.

When the Maternity Hospital is shifted to the Sanskrit College building in the Fort, two additional buildings will be required which are estimated to cost not more than Rs 20,000 The location of the Maternity in the Fort in the vicinity of the Victoria Hospital will increase its usefulness and efficiency, and the Maternity Hospital will have more healthy surroundings than in its present buildings. The present Maternity ~~Hospital~~ besides accommodating the Bacteriological laboratory will afford room for the Health Department, museum and offices and accommodation for a resident officer of the health department Of the Rs 20,000 required for additional buildings in the Fort, Dr Smyth says that Rs 13,000 can be met from the budget of the Medical Department, and only Rs 7000 more will have to be provided out of the savings caused by countermanding the extensions of the Central College for which Rs 64,000 has been provided in the D P W Budget

A new building for the Chamarajendra Sanskrit College will be necessary. It will be best constructed ~~near the Sanskrit College of the Sringeri mutt~~ in Chamarajpet It may cost about Rs 10,000.

Out of the Rs 64,000 saved from the Central College extensions, the following outlay will be met -

For a room behind the Bacteriological laboratory roughly-Rs 1000

For fitting up the laboratory as a lecture theatre--- Rs.2000

For the additional buildings for the Maternity in the present Sarskrit College apart from the Rs 13000 available in the Medical Department Budget Rs.7000.

For the corstruction of the new building for the Sanskrit College Rs,10000.

Total .. .. Rs 29,000

Savings from Rs 64,000 roughly Rs.35,000

it would go far to remove the prejudice

G

Record of Cases submitted for the Orders of His Highness the Maharaja

Subject

Estimate for extending the Central College buildings at Bangalore to adapt it to the requirements of the new University Regulations

Order.

The estimate is sanctioned With reference to the Chief Engineer's remarks on armoured concrete, it is a matter for regret that the officers of the Department generally are disposed to show little interest in so important a subject I trust that he will impress on all officers the necessity of familiarising themselves with the literature, and so far as opportunity offers with the technique of this branch of work Considering the daily increasing use of cement, I think that the feasibility of starting cement manufacture in the state should be seriously considered and I should be much obliged if the Chief Engineer would take the matter up If we could produce our materials locally, it would go far to remove the prejudice

that undoubtedly exists in certain quarters

No. 1457/1 file

Bangalore,
13th December 1901

Dear Mr Macnoche

With reference to the enquiry contained in your D O of the 10th instant, I write to say that it is a fact that a considerable portion of the cost of the Maternity building was contributed by the late Rai Bahadur Yelo Mallappa Chetty His present representative is his grandson Mr Siddalingappa Chetty I have seen the latter and he is quite agreeable to the Maternity building being transferred to the Fort and the present Maternity building being handed over to the Health Department He only asks that a photo enlargement of his grandfather, which he will present, may be hung up in the new Maternity building in the Fort This,

I have promised, will be done

I have since learnt from Col. Smyth that the Vaccine Institute can also be accommodated in the present Maternity buildings This means a further saving of money, as it would obviate the necessity for constructing a new Vaccine Institute at a large cost and will set free the allotment provided in the P W Budget for this purpose. The accompanying ground plan of the Maternity buildings received from Col Smyth shows how the accommodation is proposed to be utilised It will of course be necessary to put certain fittings, to have gas laid on, to remove one interior wall and to erect a shed for vaccination purposes, but the cost of these would be only a small fraction of the large saving

(11

effected by the adoption of the present proposals.

Yours sincerely,

B N Gadgil Rao

PRIVATE SECRETARY MYSORE

Dear Sir Madhava Rao

In reference to these proposals, I have written under the impression that a considerable portion of the maternity building was erected by a charitable citizen of Bangalore the

16

GOVERNMENT OF MYSORE

19-12-08

Dear Mr Chandrasekhariah,

The Dewan desires that the question of selecting a suitable site for the Chamarajendra Sanskrit College, Bangalore, which is to be removed from its present building into the new Fort, might be referred to the New Extension Committee

Yours sincerely
[illegible]

Submitted to His Highness

S

In his order dated 14th November 1908, His Highness was pleased to sanction certain proposals regarding extensions to the Central College, in modification of those sanctioned in orders dated 10th

A August 1908

In accordance therewith instructions were issued to the Chief Engineer to construct a large theatre at a cost of Rs 31,115 to be located in front of the Bacteriological Laboratory

Col Smyth however thought that the new building would shut out light from the Bacteriological Laboratory and said that he would himself propose a better arrangement for providing a large lecture theatre for the Central College without Government going to the expense of constructing a new building, and that the scheme he had in view would not only meet the University requirements at a cost much below what it would be even under the revised proposals recently sanctioned by His Highness, but would also enable him to carry out his long cherished idea of locating the Maternity in a healthier situation and better surroundings, putting all important medical institutions in a central locality and securing for them better supervision and control His idea is that the Maternity which is far away from the Victoria Hospital and from the City and is situated in a malarial part of the town should be removed to the Fort and located in the building where the Chamarajendra Sanskrit College is now accommodated He will make use of the existing

building for the present, and all that he wants for adapting it for the purposes of a Maternity is the construction of two additional buildings at a cost not exceeding Rs 20,000 When these two buildings are put up he will remove the Maternity to the Fort, and the present Maternity buildings will then be available for the Bacteriological Laboratory, for the Health Department Museum, Laboratory and offices and for the residence of an officer of the Health Department In fact this new arrangement will meet the requirements in full of the newly constituted Health Department, except in regard to the Vaccine Institute for which separate provision exists in the budget This will also set free the "Grace Villa" building which is now used by the Health Department for offices But against this we will have to pay rent (about Rs 40 per mensem) for the building that will be required in the Fort for the residence of the Lady Doctor of the Maternity

x It has since been ascertained from Dr Paiju that the Sanitary school also could be accommodated in the Maternity buildings

We have next to consider the question of accommodating the Sanskrit College The College can easily be removed to Chamarajpet in the new Extension where a building not to cost more than Rs 1 ,000 ought to suffice for accommodating it

When the Bacteriological Laboratory is removed to the present Maternity buildings, the present building for the Bacteriological Laboratory will be available as a large lecture theatre and the construction of a new building for it will be avoided In fact Dr Travers thinks that the present Bacteriological Laboratory will accommodate even a larger number of students than the building lately sanctioned by His Highness

All that is required in substituting the present Bacteriological Laboratory building for the building sanctioned by His Highness is the addition

of a room for additional Chemistry which is estimated to cost under Rs 10,000. The cost of fitting up the Laboratory as lecture theatre is estimated at Rs 2,000. Col Smyth, Dr Travers, Mr Bhabha and Mr Tait have considered this question and think that the proposals will meet all requirements and will be an improvement on the scheme lately sanctioned by His Highness.

The financial result of the different proposals above specified will be as follows -

As originally proposed

New building for Central College -		Rs 31,145
Health Department buildings -		
Laboratory	- no estimates received but will probably cost -	" 10,000
Museum	- -do- -	" 5,000
Sanitary school	- -do- -	" 6,000
	Total -	Rs 52,145

As now proposed

Additions to the Bacteriological Laboratory	-	Rs 10,000
Alterations to -do-	-	" 2,000
New Sanskrit College -	-	" 15,000
New building in the Fort in connection with the Maternity	-	" 20,000
	Total -	Rs 47,000

It will thus be seen that after securing so many desirable objects, a saving of Rs 5,145 has been effected by the modified arrangements proposed, which is in addition to the saving of Rs 11,000 shown in my note dated 13th November 1901.

Dr. Smyth has also been consulted and he has no objections to the alterations proposed by Dr Travers, as ample provision has been made for the

Gordon Macleod its note of 4th inst. in the Agricultural Chemist's Laboratory.

I have already submitted to His Highness that Dr. Coleman is quite agreeable to these alterations being made.

The Chief Engineer, Mr. McCutchan, has seen this memo and approves of the proposals contained herein.
